VOL XXXVII

HOPKINSVILLE KENTUCKY, SATURDAY, JANUARY 22, 1916.

No. 10

## EDITORIAL COMMENT.

The idiots showed up with a strong following in the Senate, as showed by the vote against the Trigg bill.

A request has been made that Villa be sent to Jaurez to be executed at the race track. He seems to have run his last race.

Gen. Carranza has formerly proclaimed Francisco Villa, Rafael Lopez, and Rafael Castro outlaws because of the massacre of the Americans at Santa Ysabel. Any citizen of Mexico is authorized to execute them.

The anti-pass bill introduced in the Senate is said to contain a provision prohibiting railroads from making advertising contracts with newspapers payable in passes or transportation. Such a bill can only be construed as an attack on the business interests of the press of the State. It would be a step outside of constitutional requirements or Democratic platform demands. If one kind of an advertising contract can be regulated by law, what is to hinder all newspaper contracts from being prohibited? What is to prevent newspapers from being prohibited by law, for instance, from charging candidates for office for political advertising? Are we drifting to that sort of legislation?

## Conform to the Constitution.

"The legislators may take a crack at the newspaper men in the anti-pass bill, but the newspapers can also take a crack at the legislators now, and hereafter."—Elizabethtown News.

There is no use for the legislators to incur the displeasure of the editors of the state on the anti-pass bill by making it apply to them, so as to prevent them from making contracts with transportation companies in any way that suits the contracting parties.

If an "anti-pass" bill is to be passed, let it be only to the constitution, and apply only to such persons as are named in the constitution and not step aside and make it apply to individuals unknown to the constitution.

Since this is a platform and an administration measure, we can't believe the governor would want it to apply to individuals unknown to the requirements of the democratic party platform and the constitution, simply to interfere with the private business affairs of the newspapers throughout the state.

Newspapers are too valuable to the state, to the business and to the democratic party, for a democratic legislature to oppress them in their business affairs by saying in a law what they shall or what they shall not do and we can't believe the governor and a legislature will stand for such a law.

To include the newspapers of the state in the anti-pass bill will damage the democratic party more in Kentucky than most any act this legislature could pass.

What business is it of the members of the legislature the kind of advertising contracts the newspapers make with the railroads? If the legislature can dictate in this, it can dictate in all other business contracts made by newspapers, and as a matter of fact, only a few years will pass until a newspaper can do nothing without the consent of the legislature.

Looking at it from a broad view we cannot see why our public officials and politicians do not appreciate the great work of the newspapers throughout the country more than they do. It is a hard struggle for newspaper owners to make even a scant living, when they take advantage of every legal contract possible to do this; yet there seems to be a sentiment among those who have been benefited by the power and good influence of broad-minded newspaper men to oppress them whenever the slightest occasion presents itself.

We can't believe that Gov. Stanley will stand for this gross discrimination against his newspaper friends throughout the state, in order to pacify a few disappointed politicians.—Mayfield Messenger.

## VILLA IS CAPTURED

Maximo Marquez Credited With Having Taken Bandit Leader.

## CONFIRMATION IS LACKING

Said to Have Been Hemmed in in Mountains—Several Bandits Are Prisoners.

El Paso, Tex., Jan. 21.—Francisco Villa has been captured at Hacienda San Geronimo by Carranza forces under General Cavazos, according to a private telegram from Chihuahua City received here. The telegram came from the source that first reported the massacre of Americans at Santa Ysabel. Cavazos was last reported as bringing prisoners from Guerrero to Chihuahua City.

Mexican Consul Andreas Garcia confirmed the capture of General Villa. His advice stated that the capture was affected by Maximo Marquez, who recently also captured Gen. Jose Rodriguez, one of Villa's generals.

A message announcing Villa's capture also has been received at the office of the American Smelting & Refining company.

Messages from Chihuahua City confirming reports of the capture of Villa, stated that a number of bandits who participated in the Santa Ysabel massacre were also captured and are being brought to Chihuahua City for execution.

Reports received here indicated that Villa had been hemmed in a triangle formed in the mountains. Col. Maximo Marquez was closing in from the southwest, while General Cavazos advanced from the southeast.

## DURHAM EXPERT

Addressed The Beef Cattle Association Thursday Afternoon.

W. R. Moreman, Jr., of Glendene, Ky., breeder of Polled Durham cattle, was here Thursday to talk to the Polled Durham cattle breeders and met them at 1:30 p. m. at the H. B. M. A. rooms.

Mr. Moreman outlined the history of the breed developed in 1870. Mr. Moreman is connected with the agricultural department and is a fine judge of beef cattle. He had charge of the beef cattle exhibits at the State fair for several years. He has also judged the cattle at Memphis and other large Southern fairs. Mr. Moreman advanced the idea that the Polled Durham and Shorthorn breeds, being the same breed, ought to be in one standard and that an improvement was on foot to have them known as Hornless Shorthorns. His address was heard with much interest by a good crowd and the beef cattle enthusiasm in the county shows no abatement.

Otis Kircher, state agent in charge of the Pig Club work, was with Mr. Moreman.

## No More Room.

Judge Garrett S. Wall, member of the State Board of Control of Charitable Institutions says that on account of the overcrowded condition of the State hospitals, especially with colored patients, the board will be compelled to refuse to receive patients at all of the hospitals and white patients at Lexington and Lakeland, thus throwing them on to the care of the counties whence they come. They now have over 500 more than the normal capacity.

## Anxious to Die.

Emery Llewellyn, of Lexington, Ky., tried to commit suicide at Evansville by jumping into a fire made with railroad cross-ties. He was pulled out with severe burns and later had to be held to keep him from jumping under a moving train.

## ANSWER LEA'S CHARGES

Deny They Have Violated Law in Issuance of Free Transportation.

## SOME HOT SHOT FOR LUKE

Charge That His Own Friends Have Used Many Free Passes.

Nashville, Tenn., Jan. 19.—Denying that it has issued free passes for the purpose of corruption or bribery, or that it has violated either laws of the United States or of the State of Tennessee in the issuance of such free transportation, and charging that the petition of Senator Luke Lea was "not filed with a view of subverting the public good, but from malicious and improper motives," the answer of the N. O. & St. L. Railway has just been filed with the Interstate Commerce Commission in Washington by the attorneys of the road. At the same time the answer of the L. & N. railroad was filed with the commission.

The petition filed with the commission some time ago by Senator Lea attacked the legality of the issuance of passes in Tennessee by the L. & N. and the N. C. & St. L. Railway, and charged that such issuance of passes was for the purpose of corruption and bribery, and also that it was directed against the L. & N. and N. C. & St. L. roads operating in Tennessee which are and have been issuing intrastate passes, and that if Senator Lea is sincere in his petition he should not have mentioned only two roads and omitted the others.

The answer of the roads also refers to the recent Senatorial primary and the attempt of the petitioner to make a railroad issue in that campaign; of his utter failure to make such an issue, and of his repudiation by the polls. In referring to repeated attacks made through the columns of the Senator's paper directed against the L. & N. and N. C. & St. L. roads, the answer characterizes them as "false statements intended to arouse the prejudice of the people against respondent and in favor of petitioner."

The answer also reproduces letters showing that from December 1910 to January 1, 1914, the paper owned and published by Senator Lea "requested" free transportation and such transportation was furnished to the Tennessee and American just as it was to other newspapers over the state, daily and weekly. One letter which is a request for a book of fifty trip passes bears date of Dec. 9, 1913, thirty days after Senator Lea's resolution was passed in the U. S. Senate. These letters are given, the answer says, to show that in the issuance of free passes all papers were treated alike notwithstanding their editorial attitude, and that certainly no effort was made to "corrupt" the paper of petitioner or to influence it in any way.

The answer admits the issuance of free passes to farmers and educators, to preachers and to representatives of various charitable institutions. It maintains that through the co-operation with the Department of Agriculture, Department of Education, etc., that much good has been accomplished to the state by enabling the farmers to gather in institute meetings and by making possible the gathering of the public school teachers in educational meetings. The answer also says it has given passes to newspapers, particularly the country press, "to encourage such newspaper enterprise. It has believed that prosperous newspapers of this character are of great advantage to the development of such communities, and it has been willing to aid those engaged in such enterprises by a moderate amount of free transportation."

The answer also refers to the fact that for twenty years the railroads have given free transportation to the governors and other public officials of the state, who request it and that it remained for Senator Lea to charge

## RECEIPTS ARE STILL LIGHT

Though Prices Are Still Firm on The Loose Floor Market.

## SEASON IS DISAPPOINTING

Total Sales Less By 500,000 Pounds Than This Time Last Year.

Sales on the loose floor tobacco market this week were again disappointing as to the amount of receipts. But little more than 300,000 pounds were sold and the sales are still far behind the corresponding period last year. The bright side is that the weekly average in prices still shows an upward tendency and is 70 cents higher than the average for the season.

It is true the weather had not been favorable until the last few days and the dirt roads are in bad condition. The policy of dragging the dirt roads seems to have been abandoned by the farmers in many localities and as a result roads that were good last year are now very bad.

The following is the report for the week:

Week ending Jan. 20, 1916	Unsold stock Jan. 1, 1916	237 hogsheads.
Receipts for week	0	11 lbs.
Receipts for year	12	11 lbs.
Sales for week	10	11 lbs.
Sales for year	55	11 lbs.

## LOOSE FLOORS.

Sales week	307,405 lbs.	
Sales for season	1,174,040 lbs.	
Sales for same date	1915	1,921,930 lbs.
Average for this week	\$5.62	
Average for this season	\$4.92	

H. H. ABERNATHY, Secretary.

## Clarksville High School.

The Clarksville city council recently sold \$30,000 of school improvement bonds are now being made for this sum to be spent on the high school site. A manual training department is to be added, together with an up-to-date gymnasium and swimming pool, and when completed will be one of the finest schools in the south.

For removing dust from furniture a paint brush is much more satisfactory than a dust rag.

that they were corrupted by such free transportation.

The answer denies that free passes have been issued to prominent interstate shippers in order to influence their shipments, and also denies that the issuance of intra-state transportation has become a burden upon interstate commerce as charged by Senator Lea in his petition.

The answer also says that respondent is advised that the issuance of intra-state passes is something over which the Interstate Commerce has no control; that it is a matter wholly without its jurisdiction, and that the state railroad commission knows and has known the practices of the various railroads in the state, and furthermore that the section referred to by Senator Lea as covering the issuance of passes in Tennessee, is not interpreted by either the interstate Commerce Commission or the state railroad commission the same as petitioner Lea interprets it—and that section of the law is quoted in the answer, showing that where the petitioner seeks relief, that part of the law is not used as in the Act to Regulate Commerce; in other words, that where the Hepburn Act speaks about property, persons, etc., the Tennessee law omits "persons."

The answer also says that the giving of passes by public service corporations is different from giving of patronage by politicians, for in the former case the road gives something that belongs to it, while in the case of the politician he may, on occasion, give something which belongs to the people of the state or the United States.

## NICHOLAS COMES BACK

Russians Violently Attacking Austrians Along Bessarabian Front.

## LOSSES SUFFERED BY TURKS

Fighting Is Resumed Between Austrians and Montenegrins. King With Troops.

London, Feb. 21.—The Russians, with strongly reinforced armies, are violently attacking the Austro-Hungarians, along the Bessarabian frontier. The Austrian official report says that between Toporutz and Boyan the Russians at several places entered the Teutonic trench and engaged the defenders in hand-to-hand encounters.

To the northeast of Czernowitz, the Russians claim to have captured an Austrian sector and to have repulsed two desperate counter attacks.

The Russians' official communication tells of a raid on the black sea by Russian torpedo boats, 163 sailing vessels being destroyed along the Anatolian coast.

In the Caucasus, the Turks, Petrograd claims, were thrown from their positions in the center of the long front, suffering heavy losses.

Announcement is made in the British house of commons that the British column, coming up the Tigris valley to the relief of Kut-el-Amara, is in close touch with the Turks seven miles from Kut-el-Amara. A big battle between the relief column and the British hemmed in at Kut-el-Amara, and the Ottoman forces, is expected soon.

## BUTTERFAT AT 40 CENTS

Fox Brothers Increase The Price of Cream For Their Plant.

An important announcement is made in the Kentuckian's advertising column by Fox Brothers Co. On and after Jan. 24th they will increase the price paid for butterfat to 40 cents per pound delivered at their creamery plant. They are doing this to induce every farmer who possibly can do so to bring in his cream. They want to arrive at the maximum number of cows that can be secured for this plant. The offer they are now making is to guide them in certain contemplated changes. Instead of semi-monthly payments, they will also inaugurate weekly payments and in other ways give advantages to their patrons.

## Father of Thirty.

A jury in the Knox circuit court decided that J. Fuson, father of thirty children, was not entitled to damages as a result of alleged injuries received in a wreck on the Cumberland railroad. In the evidence it was brought out that Fuson, 59 years old, is the father of 30 children, and 22 of whom are living. He has been married three times. Fuson is a farmer of near Warren, Knox county.

## Displayed Their Bodies.

After being placed on exhibition in Jaurez, the bodies of Rodriguez and Baca-Valles, executed Villa leaders, are to be shown in public again as examples of what will happen to anyone adopting the career of an outlaw in Mexico.

What appears to be the only portion of last week's meteorite so far found is that just discovered by former Constable Quince Stockdell in his back yard near Georgetown. It is two by four by seven inches in size and weighs two pounds. It is cupped in two places and appears much like iron ore. This bit of meteorite was almost buried in the ground when found.

## PAUPER IDIOT BILL DEFEATED

Drastic Anti-Pass Measure May Suffer Like Fate in Senate.

## STANLEY NOT BACKED UP

Senators Say Some of Drastic Features of Bill Must Be Eliminated.

Frankfort, Ky., Jan. 21.—The crushing defeat in the senate Thursday of the Trigg pauper idiot bill, and the unmistakable evidences that the anti-pass bill may suffer a like fate, unless some of its more drastic features are eliminated, were the absorbing topics of gossip.

It seems assured that the administration will not be able to pass the anti-pass bill, unless it consents to an amendment for the exemption of newspapers from the operation of the measure. Opponents of the bill, in present form, and their victory is already won.

Friends of Gov. Stanley have been bringing pressure to bear upon him to persuade him to surrender to the clamor of the rural newspapers, the editors of which are very much excited, it appears. The whole commotion has placed the governor apparently in a very embarrassing position. If he surrenders his political enemies will declare that he has done so through the fear of the power of the country press on his political future. If he stands to his guns, the outlook is that he will suffer a defeat which the means are acted upon.

## NEWSPAPER PEOPLE PROTEST.

James B. Stearns, editor of the Nicholasville News, and president of the Kentucky Press Association, and G. B. Smith, editor of the Mt. Sterling Advocate, and chairman of the association legislative committee, are in Frankfort to protest against the passage of the Stricklett-Pickett anti-pass bill, which they say is bitterly opposed by the newspaper publishers of the state as an unwarranted interference with railroad rights. President Stearns said he was receiving protests from editors by wire and mail from every section of the state against the passage of the bill.

The Trigg bill, which was defeated in the senate by a vote of 22 to 8, provided that counties must pay half of the annual per capita allowance for pauper idiots. The state now pays the whole allowance—\$75 per capita—and the bill would reduce the appropriation one-half. This measure was generally regarded as one of the administration's economy bills.

Senator Frost's bill for the submission of a constitutional amendment "prohibiting the manufacture and sale of intoxicants," will be reported in the senate, with recommendation that it ought to pass.

Dry adherents in the legislature are determined to push the state-wide amendment at least such is the determination of the leaders. There are a great many "dry" legislators who say they would prefer not to press the bill at this session, but they will support it if it is brought up for consideration. This means that prohibition will be the dominant issue during the session.

Several wet senators declared that they are glad that the state-wide bill is to be reported. "We'll just kill it and forget when it comes up next Tuesday," they confidently aver.

## Nobody Loved Him.

Dr. W. Z. Moore, 45 years old, a prominent patent medicine manufacturer of Paducah, was found dead in his room in a boarding house at Atlanta from gas poisoning. Dr. Moore, the night before, said to Geo. Pursley, a friend who lodged in the house: "Nobody loves me, George, nobody cares for me."

## Lost Little Daughter.

Pearl, the 5-year-old daughter of Mr. John Richerson, of this city, died Wednesday night of cerebral hemorrhage.

Advertising Rates on Application.  
212 SOUTH MAIN STREET.

THURSDAY, JANUARY 20

The South has approximately 240-  
000,000 acres of undeveloped land.Little Montenegro has rejected  
Austria's peace terms and King  
Nicholas has sought refuge in Italy.Mrs. Syd Knight, of Fayetteville,  
Tenn., had her husband arrested for  
treating her cruelly, but when the  
sheriff shot him she took it all back  
and said she never was happier in  
her life.President Wilson's plans for going  
before the country on the national  
defense issue took definite shape  
Thursday and the work of mapping  
out the itinerary of his first speak-  
ing trip was almost completed. It  
also was decided that if public busi-  
ness permits, other tours will be  
made in as quick succession as pos-  
sible. A revised outline of the first  
trip drafted Friday calls for visits  
to eight or nine middle western  
cities, including Cincinnati, Cleveland  
and Toledo, Chicago and Des Moines.  
The president probably will start  
west immediately after his visit to  
New York January 27 to deliver ad-  
dresses before the Railroad Business  
Association and the motion picture  
board of trade. He probably will  
remain away from Washington about  
a week.Considerable opposition has de-  
veloped to the drastic anti pass bill  
being backed by the administration,  
and there is a lot of criticism being  
indulged in concerning what is  
characterized as the undue haste in  
pushing the measure through with-  
out a hearing of those interested in  
its provisions. In this connection it  
is pointed out that although the  
most sweeping over presented in the  
Legislature, it was jammed through  
the Senate committee to which it  
was referred after a notice of only  
six hours. Protests against the  
passage of the measure are begin-  
ning to come from the newspaper  
publishers of the State, who appear  
to be especially aimed at in the bill,  
which prohibits newspaper publish-  
ers from publishing advertising  
advertisements on a contract basis.  
The Kentucky Press  
Association at its recent conference  
met at Lexington and on the or-  
der against any measure that would  
affect their business with the rail-  
roads on a contract basis and a  
Legislative Committee was appointed  
to look after their interests.

## Abolishing Offices.

Frankfort, Ky., Jan. 19.—Among  
the bills introduced in the house was  
one abolishing the position of inspec-  
tor of revenue agents, now held by  
John E. Byars, of Hopkinsville. Bills  
also were introduced to abolish hotel  
inspectors.

## Divorce Suit.

Mayfield, Ky., Jan. 19.—A suit for  
divorce has been filed in Circuit Court  
by Mrs. Maude Sullivan against W.  
D. Sullivan. They have been married  
since 1901 and the action for di-  
vorce caused a surprise. The defend-  
ant is a number of years older than  
the plaintiff and was at one time one  
of the most prominent and wealthy  
planters of the county. Mrs. Sullivan  
also sues for \$1,000 alimony.

## Carranza's Responsibility.

On the confirmation of the story  
that Carranza had given the head of  
the American party massacred in  
Mexico safe conduct depends whether  
the United States will demand indem-  
nity as well as punishment of the  
bandits.DAIRY  
FACTS

## YELLOW CREAM AND BUTTER

Experiments Show Popular Belief  
That Color Indicates Richness  
in Quality Mistaken.The belief that a bright yellow color  
in milk means richness in quality is  
not true. Experiments conducted at  
the college of agriculture of the Uni-  
versity of Missouri show that the  
change from the white cream and but-  
ter in winter to yellow cream and but-  
ter in spring and summer does not in-  
dicate an increased fat percentage.  
The very highest colored milk that a  
cow can give may have the lowest fat  
percentage. Such a condition is found  
in the so-called colostrum milk, the  
first milk that a cow gives after giv-  
ing birth to a calf.The explanation of the wide differ-  
ence between the results of the ex-  
periments and the popular belief in  
regard to the relation of color to rich-  
ness lies in the cause of the natural  
yellow color of cream and butter. It  
was found that cows were not able to  
produce the yellow coloring matter for  
their cream and butter. The coloring  
matter must be derived from the feed.  
The yellow coloring matter of milk  
was found to be identical with a yel-  
low coloring matter that is widely dis-  
tributed in plants and fresh grass.  
This coloring matter is called carotin.  
It takes its name from the carrot,  
where it is very abundant, and where  
it was first discovered by scientists  
more than one hundred years ago.The difference in the color of cream  
and butter in winter and spring was  
found to be due to the fact that the  
winter feeds contain little or no carotin.  
No marked increase in the fat per-  
centage accompanies the increase  
in color when foods rich in carotin are  
fed. It has been shown that the aver-  
age cow gives a higher per cent of  
fat in its milk during the winter than  
in the spring and summer.

## BUTTERMILK GOOD FOR CALF

Feeding Value is Practically Same as  
That of Skim Milk—Some Danger  
of Tuberculosis.Calves can be successfully raised  
with buttermilk instead of skim milk,  
says one farmer. The feeding value  
of buttermilk is practically the same  
as that of skim milk. There is some  
risk of contracting contagious diseases  
such as tuberculosis in feeding fac-  
tory buttermilk, unless the buttermilk  
is from pasteurized cream. For this  
reason skim milk is more desirable.  
Buttermilk should always be fed as  
fresh as possible so that the degree of  
acidity is the same.Buttermilk may be substituted for  
skim milk when the calf is three  
weeks old. The substitution should  
occupy a period of a week or ten  
days, so that the calf is at least a  
month old by the time the diet con-  
sists wholly of buttermilk.Other feeds should be used with  
buttermilk just the same as with  
skim milk. Equal parts of ground corn  
and either oats or bran with alfalfa  
or clover hay has given the best re-  
sults. Calves will usually begin to  
milk a little clover hay when two  
weeks old. They may be taught to  
eat grain at the same time by placing  
a little in the bottom of the milk  
bucket after feeding.

## MILK MACHINE WORKS QUICK

Task of Milking Cow May Be Accom-  
plished Rapidly and Economically  
—No Danger of Injury.The American Illustration  
and description of the machine, in-

Milking Machine.

vented by A. Truehot of Choteau,  
Mont., as follows:By means of this device the milking  
of a cow may be accomplished rapidly  
and economically and with no  
danger of injuring the animal. The  
apparatus is of light weight, and is  
adjustable so as to permit the move-  
ment of the animal during the milking  
operation. The milking operation  
closely simulates that of manual op-  
eration.

## Cost of Keeping Cow.

The annual cost of keeping a cow  
is close to \$65. If a man values his  
labor at 15 cents an hour it takes a  
good milker to pay her way, one that  
produces anyway 5,000 pounds of milk  
a year separating out 200 pounds of  
butterfat.

## Ventilation is Essential.

Ventilation is absolutely essential  
for the health of the cows, but is one  
of the hardest problems to solve in  
most barns.

## A Strange Story.

Argyle, Mich. Mrs. Wm. H. Car-  
son, in a letter from Argyle, says:  
"I was almost wild with pain in my  
head, and other severe pains, due to  
womanly troubles. Cardui gave me  
great relief at once. Further use of  
Cardui raised me from my bed of  
agony. Cardui saved my life, and I  
can't be thankful enough for what  
it did for me." Whether seriously  
sick, or simply ailing, take Cardui,  
the woman's tonic. As a general  
tonic for women, to improve the ap-  
petite and build up the constitution,  
Cardui is in a class by itself. Those  
who have used it say it does the  
work; it relieves, it cures. Try it.  
Your druggist has it.—Advertisement.

Nothing suggestive or vulgar in its appearance and its beauty and  
simplicity appeals to every one. You will want a "Popular Girl"  
Calendar. Send all Subscriptions to the Kentuckian, Hopkinsville,  
Kentucky.THE THRICE-A-WEEK EDITION  
OF THE NEW YORK WORLDPractically a Daily at the Price  
of a Weekly. No other News-  
paper in the world gives so  
much at so low a price.There never has been a time when  
a newspaper was more needed in the  
household. The great war in Eu-  
rope has now entered its second year,  
with no promise of an end for a long  
time. These are world-shaking  
events, in which the United States,  
willing or unwilling, has been com-  
pelled to take a part. Nointelligent  
person can ignore such issues.The Presidential contest also will  
soon be at hand. Already candidates  
for the nomination are in the field,  
and the campaign owing to the ex-  
traordinary character of the times,  
will be of supreme interest. No other  
newspaper will inform you with  
the promptness and cheapness of the  
Thrice-a-Week edition of the New  
York World.THE THRICE-A-WEEK WORLD'S  
regular subscription price is only  
\$1.00 per year, and this pays for 156  
papers. We offer this unequalled  
newspaper and the Hopkinsville Ken-  
tuckian together one year for \$2.65.  
The regular subscription price of  
the two papers is \$3.00.

## Actual Blockade.

That Great Britain will soon an-  
nounce the establishment of an actual  
blockade of Germany and her allies,  
thereby superseding the condition  
which had been established by the  
Orders-in-Council is the statement  
made by Americans who have been  
in close contact with the machinery of  
the British Orders-in-Council.We Grind Our

**The Kentuckian****SANITARY MILK PLANT**Cleanliness Often Overlooked in  
Rush of Business.Score Card Used by Dairy Inspectors  
Should Be Posted Where It Can  
Be Easily Seen by Employees  
—Avoid Strainers.During the rush of business the im-  
portance of cleanliness in the milk  
plant is often temporarily overlooked.  
As a reminder of points often neg-  
lected in this way, a score card, such as  
is used by dairy inspectors in scoring  
city milk plants, should be posted  
where it can be easily seen by the  
employees who, by studying it, can  
learn wherein they are lacking, from  
the inspector's point of view. The  
dairy division of the United States de-  
partment of agriculture will send a  
sample score card on request.Many of the items on the card are  
self-explanatory, but there are some  
details in milk-plant sanitation which  
are not given on any score card. If  
the floors, walls and ceiling are  
smooth and are made of sound and  
durable materials, they may be easily  
kept free from dirt and dust. Con-  
crete floors are very satisfactory, for  
they can be flushed often with wa-  
ter, there is no danger of rotting, and  
if properly constructed there will be  
no cracks in which dirt can collect.  
Iron plates laid in cement are sani-  
tary and are more durable than con-  
crete.A separate room for handling the  
milk apart from all other operations  
is essential and all doors must be kept  
closed to exclude flies and impure air.  
It is better to provide pure air by  
means of a modern system of ventila-  
tion. Even when the air is pure, the

Tank for Storing Milk.

vats, pasteurizers, coolers, fillers and  
other apparatus should be covered to  
prevent all unnecessary contact with  
the air.The milk must be kept cool after it  
is received at the plant, and not be  
allowed to stand long before bottling.  
If not used at once the cans should  
be put into a refrigerator, or the milk  
stored in tanks made for this purpose.  
These tanks must be in a cool place  
or be surrounded with a jacket of ice  
water or brine. Strainers or cheese-  
cloth are more satisfactory and more  
easily cleaned than those of wire  
gauze, but the use of strainers of any  
kind should be avoided as much as  
possible. Some dealers strain the  
milk after it is pasteurized before it  
is run into the filter. This may in-  
crease the bacterial count and fur-  
thermore is unnecessary if the milk  
is properly clarified or filtered before  
pasteurizing and if the apparatus is  
clean.A filter of cheesecloth and cotton,  
if used, must be changed several  
times during the day. The cheese-  
cloth must be washed, sterilized and  
kept where the air is pure. It can be  
used a few days before throwing away,  
but the cotton, of course, should be  
used only once. As soon as the milk  
is put up all parts of the apparatus  
should be thoroughly cleaned by first  
rinsing in cool water, then washing  
with hot water to which washing  
powder has been added, and finally steri-  
lized with boiling water or steam.

Covered Milk Pail.

The pumps and pipes can be rinsed  
by pumping water through them im-  
mediately after using. They must  
then be taken down and thoroughly  
washed; this can easily be done if  
there are several couplings in the  
pipes. All joints and couplings must  
be kept tight and free from dirt, rust  
and corrosion. Battered and rusty  
apparatus or cans afford good lodging  
places for bacteria and, being hard  
to clean, should not be used.The pasteurizer is one of the most  
difficult pieces of machinery to keep  
clean, as the milk sometimes sticks  
to the sides and, if not properly  
cleaned, a cooked layer forms on the  
inside, which grows worse each day.**Sterilizing Milk.**  
Milk can be sterilized by electricity.  
At the University of Liverpool (Eng-  
land) it was found that by the use  
of electricity the number of bacteria  
is reduced greatly, all the colon bac-  
cilli the bacteria of bowel troubles  
and their allies are destroyed; all the  
tuberculosis germs are killed; no  
chemical change nor change in taste  
is made in the milk.**Ideal Greens for Hens.**  
Cabbages, beets and mangels make  
ideal greens for hens during the win-  
ter. Small potatoes and specked ap-  
ples are also relished, particularly  
when the fowls are confined to their  
poultry quarters.**DUST BOX FOR WINTER**Methods of Eradicating Lice  
Practiced by Poultrymen.Outdoor Wallow Shown in Illustration  
Is Simple in Construction and  
Efficient in Operation—Lice  
Powder Recipe.During the winter and early spring  
months hens are likely to be infested  
with lice. This is often because they  
are confined to the poultry house dur-  
ing this period and do not have access  
to their accustomed dust wallow.Two methods of eradicating lice are  
commonly practiced by poultrymen.  
One is to dust each hen with a good  
lice powder; the other is to provide  
a dust wallow.Both of these methods have disad-  
vantages. The first requires consid-  
erable labor, for experience has proved  
that two applications of lice powder,  
eight or ten days apart, are necessary  
thoroughly to rid the fowl of lice. The  
second method, consisting of an open  
or partly enclosed box filled with dust-  
ing material and located in the poultry  
house, is unhealthy and harmful.A box that will not fill the air of  
the pen with particles of dust is an  
improvement. The outdoor wallow  
shown in the illustration is simple  
in construction and efficient in opera-  
tion. It may be constructed of a box  
or any kind of lumber.One side of the box is removed and  
replaced by a cellar sash. A standard

Rear View of Dust Box.

size, two-light sash is cheap, and pro-  
vides sufficient light to make the wall-  
ow attractive. The top should slope  
somewhat, so it will shed water, and  
should be covered with roofing paper.  
The rear side of the box, next to the  
poultry house, is also removed, with  
the exception of a single board eight  
inches high at the bottom, which holds  
in the dusting material. On each side  
of the box, directly under the roof,  
poultry netting is used to cover the  
opening caused by the slope. The free  
circulation of air thus maintained  
tends to settle the dust.The opening leading from the house  
to the wallow is covered with a piece  
of muslin which is slit in the middle.  
This keeps the dust from coming into  
the house.The dusting material used in the  
box is worthy of mention. Three parts  
sand, one part land plaster or gypsum  
and a quart of lice powder will be  
found effective. A good recipe for  
lice powder is as follows:Place two and one-half pounds of  
plaster of paris in a pan. Then mix  
together three-fourths of a pint of  
gasoline and one-fourth of a pint of 95  
per cent crude carbolic acid. Stir the  
plaster of paris while you add the  
liquid. When thoroughly mixed the  
material should be rather crumbly. It  
should then be dried and sifted, when  
it is ready for use. Keep in a tight  
can or jar.**CAUSE OF POOR CORN YIELD**Inferior Quality of Seed Is Given as  
Chief Reason for Small Average  
in United States.The average per-acre yield of corn  
in the United States is less than 25  
bushels—not half a crop.Poor seed is the greatest cause of  
the poor yield of corn. Just one small  
eight-ounce ear of corn added to each  
hill will raise the average in the  
United States to 52 bushels per acre,  
double the yield and value of the crop  
and add about \$1,700,000,000 to its  
total value.Corn from a standpoint of acreage  
yield and value exceeds every other  
crop.Wherever corn is grown there you  
find high-priced land and prosperous  
people.No other crop can replace corn, but  
corn can readily take the place of any  
other grain crop.Corn is put to a greater number of  
uses than any other crop that grows.  
There are greater possibilities for  
improvement, yield and quality of  
corn than any other crop.**SILLO IS SAFEST INVESTMENT**Practical Form of Insurance Against  
Shortage of Feed at Critical  
Time During Winter.A sillo is the safest investment a  
farmer who keeps stock can make. It  
is a practical form of insurance  
against shortage of feed at a critical  
time.It maintains the herd and flock in  
better condition and more economical-  
ly in winter and supplements pastures  
during summer drought.It may also save a corn crop hit by  
an untimely frost, for frosted corn can  
be utilized in this way which would  
otherwise be almost a total loss.**Hoghouses Need Good Roofs.**The hoghouse should have as good  
a roof as any building on the farm. A  
leaky roof is death to early spring  
pigs and also is very uncomfortable for  
the older hogs at any time. The  
hog will pay as good returns for quar-  
ters as any other animal.**Terrible Train of Troubles.**Lake Charles La.—Mrs. E. Fou-  
neir, 516 Kirby street, says: "The  
month before I took Cardui, I could  
hardly walk. I had backache, head-  
ache, pains in my legs, chills, fainting  
spells, sick stomach, dragging feel-  
ings, and no patience or courage.  
Since taking Cardui, I have no more  
pains, can walk as far as I want to,  
and feel good all the time." Take  
Cardui and be benefited by the pe-  
culiar herb ingredients which have  
found so efficient for womanly ills.  
Cardui will relieve that backache,  
headache, and all the misery from  
which you suffer, just as it has done  
for others. Try Cardui—Advertisement.**Mine a Mile Deep.**The deepest mine—gold or of any  
other metal—is located in Brazil. It  
is near a place bearing the name of  
Villa Nova de Lima, in the State of  
Minas Geraes, about 330 miles north  
of Rio de Janeiro. It has been work-  
ed more than 80 years. The com-  
bined depths of the connected shafts  
give a total of 5,824 feet. In other  
words, here is a gold mine that is be-  
ing worked at a depth of more than a  
mile below the surface of the earth.  
Now, be it remembered, that the rock  
temperatures increase as the earth's  
crust is penetrated, in some regions  
the increase being as much as 1 de-  
gree Fahrenheit for each 50 to 60 feet  
increase in depth. At this rate the  
temperature at the bottom of this  
mine would be over 100 degrees high-  
er than at the surface and fried ham  
and eggs might be prepared for the  
miners without any other heating ap-  
paratus than the loose rocks lying  
about. Incidentally the miners would  
be going through the frying process  
too. Fortunately, however, in this  
mine the rate of increase temperature  
is only 1 degree for every 100 to 120  
feet, giving the rocks a temperature  
of only 112 degrees. By forcing  
cooled air down into the mine by  
means of fans the temperature is low-  
ered to a little less than 100 degrees.  
Even at that it is rather snug. Still,  
the mine has produced a total of about  
\$55,000,000 worth of gold, and is  
being worked now at a profit of some-  
thing over \$700,000 annually.**A Soldier's Unique Will.**A French soldier fighting in the  
Argonne has just inherited an estate  
valued at \$40,000 from an eccentric  
army officer, who lives in the soldier's  
native village. The only condition  
attached to the legacy is that the  
soldier must, from time to time, visit  
the grave of his benefactor and relate  
there some of his war experiences.The will says:  
"Being without family I leave the  
whole of my fortune to Paul Cambon,  
farmer. I desire thus to show my  
gratitude to him for having for many  
years listened patiently and with ev-  
ery air of interest to the stories I used  
to tell of the War of 1870. I trust  
that he will be spared to return to the  
village after the present war, and my  
only request to him is that he come  
occasionally to my tomb and there re-  
late some of his own war experi-  
ences."**BUCK WHEAT CAKES**

## THE J. H. ANDERSON COMPANY

INCORPORATED

### WATER-SOAKED OYSTERS.

Some Dealers Violate Food and Drugs Act by Causing Oysters to "Drink" Fresh Water.

Inspectors of the department, in giving special attention to the heavy traffic in oysters during the holiday season, have found it is the practice of some dealers to add fresh water to shucked oysters in such a way as to greatly increase the size of the oysters. The oyster when brought in contact with fresh water for several hours will "drink" or absorb a considerable quantity of the water and will increase in size in exact proportion to the amount of water which it "drinks." As oysters are usually sold by the pint or quart, any increase in their size due to the addition of water enables the dealer to fill the pint or quart measure with a smaller number of oysters. In order to increase the size, oysters must be soaked in fresh water that is only slightly salty. They will not "drink" enough of the salt water in which they are grown to increase materially in bulk; nor will will oysters increase in bulk to any extent from being washed in fresh

water if they are allowed to remain for only the few minutes necessary to cleanse them.

If 4 quarts of oysters and 1 quart of fresh water are placed in a 5-quart container and the mixture allowed to stand for several hours, there will be a marked change in the appearance of the contents of the container. To the naked eye there will appear to be 5 quarts of dry oysters, for the container will be full and there will be little or no water in sight, it being on the inside of the plump, succulent-looking oysters. The average purchaser has no means of detecting the addition of water. The chemist, however, by determining the amount of water in the oyster and comparing it with the amount that an oyster normally contains, can readily detect the adulteration.

### Warren County Patient

Annie Clark, aged 38 years, of Warren county, died at the Western State Hospital Wednesday night of exhaustion. She was received here about nine months ago. The remains were shipped to Bowling Green.

### Wolf-Harned.

Sherley E. Wolf and Miss Kate Harned, popular young people living about five miles east of the city, were married Jan. 19 by Judge Knight, at his residence in this city.

### COMPLICATED WAS CASE

Archie Mann Succumbs After Weeks of Intense Suffering.

Archie Mann died at the Jennie Stuart Memorial Hospital Thursday morning. About a month ago Mr. Mann, who had been residing in South Christian for some time, was brought to the hospital and an operation was performed. His appendix was ruptured and he was also suffering from an abscess of the liver, with other complications, which, despite the efforts of physicians and careful nursing, finally resulted in his death.

The deceased was 23 years old, a son of Mr. Jones Mann, of near Bluff Spring and was a cousin of Mr. H. L. Harton, of this city. The interment took place in the family burying ground yesterday.

### She Ate Pickles.

Mrs. Eliza D. Lathrop, aged 102 years, is dead in Louisville. In an interview given out on her last birthday, Mrs. Lathrop said that her chief article of diet was pickles and said that their use kept her in good health.

### WILLIS ESTATE IN BIG CONTEST

Parents of Walter Weintz and Wife in Court at Waukesha.

Evansville, Ind., Jan. 21.—Whether the parents of Walter Weintz, who lived in Evansville or the parents of Mrs. Weintz, who live in Urbana, O., shall take the \$37,000 estate left by the young people who died in an automobile accident, is to be settled in the courts at Waukesha, Wis. The trial opened Thursday. D. G. Chapell of Evansville is representing Mr. and Mrs. Henry Weintz of Evansville. The bulk of Weintz's estate came to him from his first wife (Miss Margaret Willis, of Pembroke, Ky.) who died within a short time after they were married. Later he married Mrs. Claire McCreary Viehe. It is being urged by the lawyer for the McCreary family that she lived ten minutes longer than did Weintz and consequently inherited the estate from her husband.

An entirely different suit growing out of Weintz's first marriage is to be tried at Louisville. His first wife's fortune was held in trust by a Louisville bank and was paid over to Weintz. Miss E. J. Hail of Nashville, and Miss Alice Radford, of Hopkinsville, Ky., girl companions of the first Mrs. Weintz, say the bank should have paid the money to them and not to Weintz. Weintz invested the money in a business block in Chicago and a big farm in Wisconsin. Walter Weintz and his wife were killed when a train struck their machine at Oconomowoc, Wis., more than a year ago.

### NOTICE.

Hopkinsville, Ky., Jan. 20, 1916. Notice is hereby given that a petition has been filed in the Christian County Court to open a public road in the vicinity of Edwards Mill, beginning at a point in the Edwards Mill and Nashville pike road at J. L. Brown's and passing over the land of Brown and Lowry, Combs and Lowrey, Lowrey and Burrus, Lowrey and Minor, intersecting a public road that leads to Little River, church on the Russellville Pike. Said road to be 30 feet wide and about two miles long. The County Court will on Saturday, the 5th day of February, 1916, take some action on same petition.

J. H. DILLMAN,  
Real Estate Christian County.

### WOMAN KILLS ADMIRER

John Cox Had Procured License, But Did Not Wed Mrs. Weams.

Carthage, Miss., Jan. 18.—John Cox, who lived at Tuscola, Miss., met his death at the hands of Mrs. Sallie Weams. She used a pistol with deadly effect, shooting Cox through the head.

Cox had been a frequent visitor at the home of Mrs. Weams for some time. During the Christmas holidays he procured a license to marry Mrs. Weams, but at the time of his death

he had never married her, and it is thought his refusal to comply with his promise to Mrs. Weams, was the prime cause of the tragedy.

The deceased was about 30 years old, while the woman is said to be probably 40 years old.

### Judge Hanbery Affirmed.

The Appellate Court Wednesday affirmed the verdict of the lower court in the case of Hooser vs. Atkinson, from Christian county.

### A Mountain County.

Members of the Letcher County Fiscal court are planning to call an election soon to vote on a \$150,000 bond issue.

## PURELY PERSONAL.

British authorities are discussing the possibility of rubber tires for street cars.

Carmel City, Ky., is to have a factory to produce 1,000 pounds of dyes daily.

William L. Harrison, who resides in the Old Soldiers' home at Pewee Valley, is spending a few days with friends and relatives in the county.

Dr. N. S. West and wife left Thursday night for Texas for a visit to Mrs. West's sister.

Ed J. Lawson and Mrs. Lawson, of Columbia, S. C., are on a visit to Mr. Lawson's parents, Mr. and Mrs. R. C. Lawson.

Deputy Sheriff Will Hammack is still quite sick, suffering from a complication of troubles. His father, Mr. H. F. Hammack, of near Guthrie, was with him a couple of days this week.

## Paralysis Causes Death

Mrs. Minerva Robertson, of Ohio county, aged 70 years, died Thursday night at the Western State Hospital of general paralysis. She was received here Oct. 10, last. The remains were shipped to Hartford yesterday.

## TRAIN VICTIM WATCHES

## OPERATION ON FOOT.

Henderson, Ky., Jan. 15.—A young man, giving his name as Jack Conroy, and, claiming to be a graduate of Northwestern University, was injured Friday night when thrown from a moving train in the railroad yards. He was taken to the city hospital for an operation on his left foot, which was badly mashed. He refused to take an anesthetic and sat up and watched the surgeon during the operation.

## Rat Tail Contest.

The "rat tail" contest, originated by Mayor Hickman, is bringing results. Boys are entering into the contest with considerable animation, and as a consequence there has been a big decrease in the "rat family" in Owensboro. The mayor is now offering two pennies for every rat tail delivered to police headquarters. Some of the "kiddies" are earning "spending money" by killing rats. Owensboro Messenger.

## DR. BEAZLEY

## Specialist

(Eye, Ear, Nose and Throat.)

Over 1,200 labor strikes were reported in the United States during the past year.

## FINDS ANCIENT RUIN

Sun Temple Unearthed in New Mexico National Park.

Washington, Jan. 19.—The most striking prehistoric ruin yet unearthed by archaeologists in America has been found by Dr. J. Walter Fukes, of the Smithsonian Institution, who made his report to the Interior Department. The mound was located in Mesa Verde National Park in New Mexico, and apparently was built for religious rites and ceremonials. It has been named Sun Temple. There are 25 rooms and the walls, which total more than 1,000 feet in length, averaged four feet thick.

Cedar and pinyon trees growing above the mound indicate that the mound was built about 1300 A. D.

## EXCELLENT SERBIAN CUSTOM.

One of the unusual Serbian institutions which bids fair to vanish under the conqueror's hands is the Zadruga, a glorified family system said to have saved the Serbians from poverty and all its attendant evils, and left them one of the gayest races of mankind. In the Zadruga one house grows from another until a little community is established on something like socialistic principles. The stareshino, or headman, and his wife live in the biggest house and direct the industries of the satellite houses.

## DENSER.

"On what do you base your assertion that country people are brighter and more intelligent than city people?" asked the summer boarder. "Why, here in my almanac," replied Farmer Medders; "it says in the cities the population is a lot denser than in the rural districts."—London Opinion.

## DEFINING QUALITY.

"Is your husband an inveterate smoker, Mrs. Jiggers?"  
"No; just smokes the ordinary six-for-a-quart kind."

## BACK FROM EDEN.

Brown—Back to town again? I thought you were a farmer.  
Green—You made the same mistake I did.—Judge.

## Neutral Zone Proposed.

The establishment of a neutral zone in Northern Mexico to be jointly policed by Mexico and United States, unless disorders are speedily controlled, was proposed in a resolution introduced by Senator Gore, Democrat, of Oklahoma.

When visiting the battle front the Italian king always carries a camera.

**Beware of Ointments for Catarrh That Contain Mercury**  
as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co., Testimonials free.  
Sold by Druggists. Price 75c per bottle. Take Hall's Family Pills for constipation.

PAINS IN SIDE  
AND BACKHow Mrs. Kelly Suffered and  
How She was Cured.

Burlington, Wis.—"I was very irregular, and had pains in my side and back, but after taking Lydia E. Pinkham's Vegetable Compound Tablets and using two bottles of the Sanative Wash I am fully convinced that I am entirely cured of these troubles, and feel better all over. I know your remedies have done me worlds of good and I hope every suffering woman will give them a trial."—Mrs. ANNA KELLY, 710 Chestnut Street, Burlington, Wis.

The many convincing testimonials constantly published in the newspapers ought to be proof enough to women who suffer from those distressing ills peculiar to their sex that Lydia E. Pinkham's Vegetable Compound is the medicine they need.

This good old root and herb remedy has proved unequalled for these dreadful ills; it contains what is needed to restore woman's health and strength.

If there is any peculiarity in your case requiring special advice, write the Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for free advice.

## Rural Carrier Examination.

The United States Civil Service Commission has announced an examination for the county of Trigg, to be held at Hopkinsville on February 26, 1916, to fill the position of rural carrier at Cadiz and vacancies that may later occur on rural routes from other postoffices in the above mentioned county. The examination will be open only to male citizens who are actually domiciled in the territory of a postoffice in the county and who meet the other requirements set forth in Form No. 1977. This form and application blanks may be obtained from the offices mentioned above or from the United States Civil Service Commission at Washington, D. C. Applications should be forwarded to the Commission at Washington at the earliest practicable date.

## TENNYSON IN DECADENCE?

Among the most interesting real-life stories of the war is that of the British officer whose wife married again on the strength of the announcement of his death. Subsequently the officer, who had been a prisoner in Germany, returned to show that he was very much alive. So far as our researches extend, the press has nobly resisted the temptation to refer to Enoch Arden. Can it be that the modern journalist has forgotten Tennyson?

## NETHERLANDS' WEALTH GROWS.

It is estimated that the national wealth of The Netherlands has increased a billion guildens (\$100,000,000) since the war began—a gain of about \$60 per capita for the population. This estimate is based on the new and greatly increased profits from dealings in certain goods.

## 32,000 MACHINE GUNS

Russia Places Largest Order of  
Its Kind in United States.

New York, Jan. 18.—Announcement that the Russian buying commission in the United States has approved contracts for \$32,000,000 worth of machine guns with four American companies was made today, after the departure for Russia of Gen. Germonius, head of the commission. The contracts call for 32,000 machine guns, and is said to be the largest order of its kind placed here by any of the belligerents since the beginning of the war.

It was stated that Russia is endeavoring to place contracts in this country for 10,000,000 high explosives and shrapnel shells.

## An Old Love Letter.

This touching letter from Mary, the eldest daughter of Evelyn Pierpont, Duke of Kingston, and the Lady Mary Fielding, a daughter of the Earl of Denbigh, who in 1712 married Mr. E. Wortley-Montagu against the wishes of her parents, is a pathetic appeal from a woman of great genius and strength of character to her lover. After a few years of married life they separated, and Lady Mary Wortley-Montagu became for the most part an alien resident in eastern lands, and notable on account of her adventures and genius:

"I tremble for what we are doing. Are you sure you shall love me forever? shall we never repent?... Reflect now for the last time in what manner you must take me. I shall come to you with only a nightgown and petticoat, and that is all you will get by me.... 'Tis something odd for a woman that brings nothing to expect anything; but after the way of my education, I dare not pretend to live in some degree suitable to it. I had rather die than return to a dependency upon relations I have disoblged. Save me from that fear if you love."—"Heart Letters," in National Magazine for January.

King Nick reconsidered and decided that it is better to wriggle than to hold still while being gutted.

Bills have run up to 174 in the Senate and 252 in the House, and the "villain still pursues her."

House Bill No. 244, by Price, of Covington, provides for the consolidation of the offices of sheriff and jailer.

A House Bill seeks to abolish the bureau of vital statistics.

## Married Last June.

Georgetown, Ky., Jan. 17.—The marriage of Miss Leonora Carlisle and Robert Butler, which occurred at Evansville, Ind., last June 23, is just announced. Miss Carlisle has been the head milliner for Mrs. Elizabeth Hines for the last five seasons, and her romance began at the Wellington hotel, where Mrs. Hines has a parlor millinery, and where Mr. Butler, who is a native of Atlanta, Ga., was a real estate promoter for Georgia lands. The secret was not divulged even to her closest friends, the bride continuing her work. They will make their home for the present at Richmond, Ky.

## Baby Smothered.

Paris, Ky., Jan. 20.—The infant son of Mr. and Mrs. Harry Hill, two months old, was found dead Sunday morning. The family of Mr. Hill, who is an employee of the L. & N. railroad here, resides on Railroad street. The parents retired Saturday night with the baby and another child, all in the same bed. Mrs. Hill awoke about 3 o'clock in the morning and found that the infant had slipped down into the middle of the bed and had smothered to death.

The Philippine bureau of agriculture has begun a thorough study of the banana.

## FARMERS ATTENTION! 40c For Butter Fat.

From January 24th to February 17th, 1916, we will pay 40 cents per pound for butterfat delivered to our plant to all our present, past as well as future farmer patrons. Our object in paying this high price is to get a correct idea as to the number of cows that are now in the neighborhood as well as the prospective increase. This high price should induce every farmer having cows to bring in their cream. Much depends upon your response to this offer as the result will guide us in deciding upon certain important changes and improvements that will prove of incalculable benefit to our patrons.

## WEEKLY PAYMENTS

Commencing with next week we shall pay our patrons weekly instead of semi-monthly as in the past, and as soon as we can adjust our system, we shall pay daily. This we expect will be within thirty days.

## IMPROVMENT IN TESTING

To insure absolute satisfaction to all with reference to testing, our Mr. W. J. Fox [who has the development of the Dairy Industry and Creamery keenly at heart] will personally test all cream received daily, and we invite the patrons to have a representative present to witness the testing thus assuring every patron of a square deal.

Kindly make a special effort to furnish us as large a quantity of cream as possible, commencing next Monday. We invite all farmers interested in going into the dairy business or increasing their herd to see us promptly.

### Unusual Offer To Our Readers

For a limited time, and subject to withdrawal after 30 days, the well-known publishing house of the J. B. Lippincott Company, Philadelphia, founded in 1792, offers to the readers of this paper a 12 months' subscription to "Lippincott's Magazine" and a year's subscription to the Kentuckian, both for \$3.00. This is the price of a twelve months' subscription to "Lippincott's" alone. Additional to obtaining every issue of this paper for a year, our readers will receive in "Lippincott's" 12 great complete novels by popular authors, 105 short stories, crisp, entertaining, original, 45 timely articles from the pens of masters, and each month some excellent poems with the right sentiment, and "Walnuts and Wine," the most popular humor section in America. To obtain this extraordinary offer prompt action is necessary. Remit to J. B. Lippincott Company, Washington Square, Philadelphia, Pa.

### WOULD HONOR INDIAN CHIEF

College Professor Has Aroused Interest in the Memory of a Friend of the Early Whites.

Prof. Edward S. Menny of the University of Washington is arousing public interest in the memory of old Chief Pat Kanim of the Snoqualmie and Snohomish Indians. Chief Pat, a staunch friend of the early whites, is one of the forgotten heroes of pioneer days, and Professor Menny wants his grave marked with a suitable monument.

In the days when settlers had reason to fear the lurking red foe in the deep forests, Chief Pat Kanim's people were powerful where Everett now stands. It is not known just when the chief died, but he was buried on a bank of the Snohomish river.

When the grave was threatened by the overflowing river, relatives moved the remains to the little cemetery on the Tulalip Indian reservation, where many of the tribes he ruled in power now live in humble homes.

Bancroft's "History of Washington" tells of the chief's craftiness in driving Glasgow and Rabbeson from the first settlement on Whidby Island in 1848. He made a great drive with dogs, and secured sixty deer for a feast of assembled warriors. He counseled in favor of driving the white men out of the country.

Glasgow and Rabbeson went back to Tumwater, and the next year Pat Kanim led an assault on Fort Nisqually. While Pat Kanim was parleying inside the stockade, his brother was killed leading an attack by the Indians. Pat Kanim was spared, and in 1850 he made a trip to San Francisco in a sailing vessel. What he saw on that journey made him resolve to become a friend of the white man. He faithfully lived up to that resolution for the rest of his life.

### FRANCE FIRST WITH MOTORS

Used Automobiles in the Field on the Day That the Great War Started.

To the French belongs the credit for the first use of motor transport in the present war, according to the Fremdenblatt, which says that at the very outbreak of hostilities the French general staff seized 500 Paris motor buses and sent them off, packed with soldiers, to the Belgian frontier, and 1,000 other motor transports similarly improvised followed next day.

As "an approximate estimate" it is stated that "the belligerent powers in the first week of the war made use of some 250,000 motor transport wagons, apart from the great numbers of automobiles of luxury and touring cars that were pressed into service." Of this 250,000 motor wagons France had 90,000, Germany 70,000, England 55,000, Austria 25,000 and Russia 10,000. Their total value is estimated at \$200,000,000.

### Boy First to Kill Bear.

Dorset Ringer, seventeen, of Trout Run is the first Lycoming (Pa.) county hunter this season with a bear to his credit. Ringer and Floyd Bowen, another Trout Run lad, were returning from an unsuccessful coon hunt at one o'clock the other morning when they heard something crashing through the brush, and a moment later a large black bear passed 20 feet in front of them and started to climb an oak tree. Bowen was the first to fire and missed. At the report of the gun the bear started down the tree, and as it touched the ground Ringer sent a bullet into its heart, killing it instantly. Returning to the village of Trout Run, five miles distant, the boys awakened their fathers, who accompanied them to the scene and helped get the carcass home. The bear weighed 225 pounds.

### Germans Lead in Wireless.

There are about ten wireless stations in France, the most powerful being that of the Eiffel tower. The Germans have many more, and especially the great station of Nauen, with a constant transmitting power of 6,000 miles, occasionally raised to 7,200 miles. They have a similar post in Spain, and another at Sayville, L. I. opposite New York. The three pylons of the latter, each nearly 500 feet high with the antennae and all the apparatus, were manufactured in Germany, and sent from Rotterdam to Hoboken by a Holland-America steamer. When the cables connecting America with Germany were cut she had already prepared a perfect substitute, or nearly so.

### Chance to Think.

"Miss Gadders talks so much and so fast that it is impossible to get in a word."

"Yes, but I find her conversation a great help to me at times," said Professor Diggers, who is compelled to leave his study occasionally to fulfill his social obligations.

"Impossible!"

"Nevertheless it is quite true. When she talks I'm able to concentrate my mind on matters that demand my undivided attention, whereas if I were in the society of a less valuable person I might, now and then, have to make some sort of reply."

### Tourists in France.

One of the curious aspects of the war in France is the effort of the railways to encourage the customary tourist travel. The tourists, of course, are confining themselves to travel in the large part of France that is outside of the war zone, where the fear of the dangers of war may be "unfounded."

### HOW SUCCESS MAY BE WON

Suggestive Article That May Appeal to Those Who at Present Occupy Subordinate Positions.

In the Woman's Home Companion appears a practically suggestive article entitled "The Girl With Notebook and Pencil," by Anna Steese Richardson. In her article, Mrs. Richardson shows how a stenographer can, by thinking and acting for her employer, advance herself in her business career. Following is an extract from the article:

"I have known stenographers who felt that it was beneath their dignity to see to the dusting of their employer's desk; who felt that they did not need to pay any attention to his supplies of pens, rubber bands and letter clips; who did not notice whether his pencils were sharp or not, or whether his ink wells were filled. It should be a part of every secretary's work to see that these things are attended to; that ink wells, paste pots, pens, pencils, blotters—in fact, every bit of the desk equipment—are in order for use, and that the desk and all its fittings are absolutely dustless.

"Two opportunities are open to the stenographer: One is a private secretaryship. The other is an independent business venture. Both are reached by the same methods—accuracy, efficiency and undivided interest. A good memory helps, but interest and that great gift of thinking for and with your employer counts the most. Lastly and just as important as anything else, remember to keep absolute silence, both in the office and out of it, on all subjects relating to your employer's business."

### HEARTY EATERS ARE THESE

Commissariat Department of the British Army Will Have to Move to Keep Up With Them.

From close observation of the habits of the young Maori men in training in Auckland (New Zealand) for active service, it appears that the modern Maori has inherited, almost unimpaired, the genius for practical foraging which was one of the vital qualifications of his forefathers in the strenuous struggle for existence. They have scoured the country in the neighborhood of the camp and won easily by the score from places where the white man never dreamed there was any edible wealth at all.

The ability of the sturdy Maori recruits to assimilate comestibles is a constant source of wonder to his pale brethren.

The camp rations are admittedly generous and sufficient in their way, but the canteen is a pleasure resort, and is patronized as such. Supper is an institution, not a meal. Here is one warrior's effort at 8:30 p. m.: Two bottles of raspberry, a tin of sardines and a big lobster. This is a typical instance, and yet everyone is up, merry and bright, for physical drill at half past six in the morning.

### Up to the Scratch.

One of the attractions at the Iowa state fair last year was Beachey, the aviator sometimes advertised as the "human bird." As he was preparing for one of his flights, a large colored woman in a stiffly starched white dress stood outside the race-track fence, about forty yards behind the aeroplane. When the propellers started, they created a small whirlwind, and sent back a cloud of dust and pebbles that blinded and pelted the nearest spectators.

After the flight, the colored woman stood looking at her soiled dress, with an expression of regret oddly tinged with pride that she had been the recipient of such distinguished attention.

"What you tink of dat bird man, Sister Jones?" inquired an acquaintance, who had just edged her way through the crowd.

Sister Jones looked up and smiled broadly.

"Say, woman, dat Beachey am sure some bird! Why, dat man scratched up more dust dan fo'ty chickens in an ash pile!"—Youth's Companion.

### Band Carried in Motorcycle Parade.

A brass band of 25 pieces recently participated in a night motorcycle parade held at Milwaukee. The bandsmen were seated in side cars, one to each car. The leader directed by waving a baton to the end of which was attached a small incandescent lamp.

The problem of illuminating the music made on the instruments of the various players was solved in a simple manner. A small-globed electric lamp, mounted in a reflector and connected with a storage battery carried under the seat, was provided in each side car.

The lights were pinned to the caps, or coats, worn by the members of the band, while the wires connecting with them extended over the men's shoulders, so that they were entirely out of the way and did not interfere with the playing.

### Variation of Brightness.

In the bulletin of the Astronomical society of Barcelona, Senor Vincente Ventosa y Martinez de Velasco has just published a somewhat belated account of an observation of an unprecedented occultation of the brighter component of Beta Scorpi, which he secured on February 27, 1876. The variation in the brightness of the stars as it left the limb of the planet leads Senor Ventosa to estimate the height of the Jovian atmosphere at 1,500 to 1,100 miles.

### Time Card

Effective January 10, 1916.

TRAINS GOING SOUTH.

No. 93—C. & N. O. Lim. 11:56 p. m.  
No. 51—St. L. Express 5:29 p. m.  
No. 95—Dixie Flyer 9:35 a. m.  
No. 55—Hopkinsville Ac. 6:50 a. m.  
No. 53—St. L. Fast Mail 5:36 a. m.

TRAINS GOING NORTH.

No. 92—C. & St. L. Lim. 5:29 a. m.  
No. 52—St. Louis Express 9:55 a. m.  
No. 94—Dixie Flyer 7:08 p. m.  
No. 56—Hopkinsville Ac. 8:55 p. m.

By Special Arrangement We Offer You  
**The Hopkinsville Kentuckian**  
 AND  
**The Nashville Banner**  
 Both One Year For Only

# \$4.50

This is an unusually liberal offer, and you should take advantage of it without delay. The Hopkinsville Kentuckian will give you all the home and local news and the Banner will give you all the foreign and general news.

This is the reading season, and everybody who wants to keep up with the times must have reliable, high-class newspapers.

Trial order of The Banner one month 25c. This rate is not good in towns where The Banner is delivered at 10c per week. Also all points outside of Tennessee, North Alabama and Southern Kentucky the rate is 50c per month or \$5.00 per year.

### PARADISE FOR "JOY RIDERS"

Work of Army Chauffeurs Would Make Oldfield's Hair Permanently Pompadour.

From St. Die to Le Rudin is in the neighborhood of thirty miles, and we did it in something less than thirty minutes, writes E. Alexander Powell in Scribner's Magazine. We went so fast that the telegraph poles looked like the railings in a picket fence, and we took the corners on two wheels so as to save rubber.

Of one thing I am quite certain—if I am killed in this war, it is not going to be by a shell or a bullet; it is going to be in a military motor car. No cars save military ones are permitted on the roads in the zone of operations, and for the military cars no speed limit exists. As a result the drivers tear through the country as though they were in the Vanderbilt cup race. Sometimes, of course, a wheel comes off, or they meet an other vehicle when going around a corner at full speed—and the next morning there is a military funeral.

To be a driver of a military car in the zone of operations is the joyrider's dream come true. The soldier who drove my car steered with one hand because he had to use the other to illustrate the stories of his exploits in the trenches. Despite the fact that we were on a mountain road, one side of which dropped away into nothingness, when he related the story of how he captured six Germans singlehanded, he took both hands off the wheel to tell about it. It would have made Barney Oldfield's hair permanently pompadour.

### SEEMED LIKE HOME TO BIRD

Canary Finally Successful in Breaking Into Jail, and May Serve a Life Term.

Having been born in a prison cage, it was only natural that a canary, regretting the breaking of home ties at a moment when the door was left open, should pause in his recalcitrant career when he saw the hundreds of barred windows of the Tombs prison, remarks the New York Herald. He always had associated bars with a well-filled seed dish.

This runaway canary had been trying for several days to break into jail, mistaking it probably for a bird cage—a jail bird cage. A "down and outer" at the penny coffee stand under the Tombs wall caught the hungry and remorseful bird. John Crowley, a turnkey, who had watched the little fellow for days, gave the outcast 15 cents for the bird and took him inside the prison.

There the canary was happy again. He flew about the cagewalls, ate greedily from the bird seed dishes, took a splashing bath in the bright sunshine, and sang joyously. The bars made him feel at home, and he may serve a term for life there.

### Admired American Inventions.

As far back as 1876 some of the foreign commissioners to the Centennial showed their keen appreciation of the importance of invention and the advantages derived by America from its encouragement. One of the Swiss commissioners said: "I am satisfied from my knowledge that no people have made in so short a time so many useful inventions as the Americans, and if today machinery apparently does all the work, it nevertheless by no means reduces the workman to a machine. He uses a machine, it is true, but he is always thinking about some improvement to introduce into it, and often his thoughts lead to line inventions or useful improvements." The reports to parliament of the British commissioner said that "in the extent of invention and the number of inventions made in America, the United States was far ahead of other nations, and that 'the progress of the world is due to the progress of the American people.'"

### Her View of Self.

She was a typical East side girl and, though plumply dressed, was very pretty. While walking through Van Cortlandt park she heard for the first time of the game of golf and observed the golfers as she was asking her companion, a sprightly young girl, something about the game. The girl explained, "My Gawd," responded the other. "And do they walk all over these hills?" Then she observed some more players on the links in the far distance. "Do they play it away off there, too?" "Oh, yes," replied the girl. "They play it all over the place." "Well," concluded the East side girl, dismissing the subject with definite finality and a shrug of her shoulders, "that's another of those nice games I'd like to learn—I don't think!"—New York Times.

### Poisoning by Aeroplane Varnish.

The chronically increased production of aeroplanes during the war has led to a warning regarding the varnish employed. At the aeroplane works in J. B. H. H. a number of varnishes employed in the varnishing of aeroplanes were found to be all right, and two deaths resulted. The report of the coroner's inquest was passed on to the coroner of the county. The investigation the case was found to be poisoning by tetrachlorethane, the only solvent known for the highly combustible acetonecellulose. These accidents led to an order forbidding the use of solvents containing a high percentage of tetrachlorethane.—Scientific American.

### CAT CAUSED MUCH TROUBLE

Family Pet Has Been Formally Cautioned that "The Cave" Is Not Public Property.

Out in Woodruff place a number of small boys have banded together and done what most boys have done if they were real-for-sure boys—built a cave, says the Indianapolis News. Approaching this cave is a long underground tunnel about two feet square. What there is in this tunnel in the way of side chambers and the like, the fathers and mothers never will know, but at the inside end of the tunnel is the den, about five feet square, built in a side hill and as dark as the most cavernous depths of a Wyandotte cave.

One of the youngsters belonging to the band of cave dwellers hurried home from school the other afternoon, donned his cave outfit, and made for the tunnel. Crawling in flat on the ground, he made his way toward the den. Arriving there, he heard a scrambling noise just ahead and two fiery spots loomed up in the darkness. His teeth chattered with fright. He couldn't back away, he was too frightened to go forward, and there was no chance of escape at either side. The fiery spots became active and the boy became panicky.

Just what happened in there the outside world will never know, but when the cat—it was the family cat—came out of the tunnel it was going some. No cat ever moved faster, and it didn't stop until it had reached a barn three lots away.

And the boy—when he emerged his face was as white as the arctic snow and he was moving rapidly for the open. The next afternoon the boy painted a sign on which were the words: "The Cave" in white paint, on a blazing yellow back ground. Gazing proudly at the sign he explained: "Now, if that fool cat can read, he'll keep out of there."

### ONE SET OF BRAINS ENOUGH

Clever Man Makes Mistake When He Takes to Wife Clever Woman, Says Writer.

The wife of one of our most celebrated literary men said the other evening that a talented man should always choose a wife with nothing further than domestic accomplishments. "It is a great mistake for brainy people to marry brains," said she decisively, according to London Tit-Bits, "and, happily, few of them do it. Put two geniuses together in matrimony, and you have put two cats in a bag—nervous, fretful, irresponsible creatures, with no patience and less common sense, who will be always worrying each other and tugging in opposite directions at the matrimonial chain. If they are both talented in the same line they will wear each other out in the expression of different ideas; but if they have separate abilities, there will be pretty often a jangle about which one is the more important. What a clever man wants is a clear-headed, sensible wife, who will forget his vagaries in remembering his brilliancy and remain a constant shield between his sensitiveness and disagreeable things; something, in fact, like one of those cushions that sailors put down on the side of the vessel to keep it from jarring too roughly against the dock. Look at me, for instance; I never wrote a word for publication, painted a picture, composed music or did anything clever in all my life. But I make my husband just the sort of wife he needs."

### Gets His Soup at Sea.

Because he is bound for London where it is impossible to secure a supply of special seaweed out of which a soup is made that is especially adapted to his country, Captain Taka, the Japanese captain of the Japanese mail ship, the Yawata Maru, which is bound for San Francisco, has ordered the ship to stop at the coast of China to get the seaweed. The ship is bound for the coast of China, and the captain has ordered the ship to stop at the coast of China to get the seaweed.

The seaweed in question is found only in the Orient, and it contains a gelatinous substance which thickens the soup, and has a peculiar appeal to the oriental palate. In fact, the Japanese sailor claims there is nothing else so good in the soup-making line. It is found by fishermen at the bottom of the sea and, washed and dried, it finds ready sale in China and Japan.

### By a Lake in Winter.

The deep sense of peace which fills the woods at midwinter is nowhere expressed more fully than where a sylvan lake or pool reflects with calm surface the grayness of the patient sky.

Stimulated by the autumn recordings of the hills, and the decay of flowers, the winter is more clear and bright, as when it marks the heavy of spring and the first snow.

When the winter comes, the snow is the most beautiful of all. It is the only time when the world is so pure and so white. The snow is the only time when the world is so pure and so white.

When the winter comes, the snow is the most beautiful of all. It is the only time when the world is so pure and so white. The snow is the only time when the world is so pure and so white.

## GRACEY WANTS FAIR SHARE

Of The Road Bond Funds For The Western Part of Christian.

Gracey, Ky., Jan. 20th, 1916.  
To The Kentuckian:

In your paper of Jan. 19th, we read the names of the eight men, named for road commissioners, to represent North and South Christian, and we are at a loss to know why the Eastern and Western part of the county is not represented.

We have nothing to say about the men named by the nominating committee, as all of them are good men, and no doubt would fill the place as commissioner, with credit.

But what we would like to know is why we have been left out? The Western portion of the county has the worse roads that you will find in the county, and still we have no one on the board of commissioners to represent us.

Crofton in the Northern part of the county, has three of the commissioners you might say right together, and South Christian is almost in the same way. Now why not divide up these commissioners and scatter them over the North, South, East and West. Why just have men to represent the North and South? This is what we want to know.

East and West Christian want good roads as bad as North and South, and the only way that we will ever get good roads is to have some one that will represent us.

We as voters and tax payers of this section of Christian county have been for the past twenty years living on broken promises, by the men that have been running for the office of Magistrate, and we are tired of this, and now we want some one to get in the ring as a commissioner to represent us, that we will have as good roads as they have anywhere in the county.

Take Gracey, for instance, it is but a small place on the map but still it has been cut off for the past month on account of water standing in the road too deep to cross in safety, and then with the last freeze, the ice has been so that no one could travel the roads where the water was standing. With proper drainage this could be remedied, but so long as we have no one to take an interest in our roads we

will still have bad roads, regardless of the proposed tax.

We are all in favor of good roads, and before we say too much about the proposed bonds, we want to know who will represent us in getting our share of the money on our roads.

Respectfully,  
H. C. McGEHEE,  
Tax Payer.

Hopkinsville has two commissioners who will have no other interest in the distribution of the funds raised than to stand for a fair deal all around. We are sure both Gracey and Fairview will find them ready at all times to guard their interests.  
—EDITOR.

## After Williams.

Rules of government as submitted by the Rules Committee were adopted by the upper branch of the General Assembly. In the House Speaker Duffy appointed a committee to hear testimony in impeachment proceedings against County Judge Williams, of McCreary.

Congressman Miller of Delaware is the "baby member" of the house of representatives.

Come in and see us about it at your first opportunity. Don't wait until the very last moment but give us a little time and we'll show you what high grade work we can turn out.

## DAIRY MEN AROUSED

Cattle Association Will Meet Monday to Push Creamery Project.

## PROPOSITION NOW PENDING

Christian County Destined to Be a Great Butter Market.

The Dairy Cattle Association will hold a meeting at the H. B. M. A. Monday at 10 o'clock a. m. to further the movement started last week to secure a creamery plant here. A definite proposition is under consideration and prospects are bright to get another plant of this kind for Hopkinsville. There is no reason why Hopkinsville should not become a butter market known all over the country.

The interest being taken in dairy cattle in the county is sure to bring big results and with the fancy prices now prevailing for cream products, the new plant will do doubt hasten to occupy what is destined to be a great field for the dairy industry.

Everybody interested in dairy cattle is urged to attend the meeting Monday.

## Methodist Church.

Rev. Lewis Powell, D. D., Pastor. Sunday School at 9:30 a. m. J. H. Cate, Superintendent.

Dr. Powell will preach at 10:45 a. m. on "The Holy Catholic Church," and at 7 p. m. on "The Passing of Nebuchadnezzar's Imperial Empire in Belshazzar's Feast."

Epworth League at 6 p. m. John C. Lawson, president. Everybody come to church Sunday—show your metal and faith are not dependent upon weather conditions. "Acquit yourselves like men!"

## First Christian Church.

J. Newton Jessup, Pastor, Bible School 9:30 a. m., George W. Crenshaw, Supt. Christian Endeavor 6 p. m.

The pastor will preach in the morning on "A Study in the Holy Spirit—His Relation to Believers." In the evening he will preach on "A Good Sticking Place."

In the February number of Popular Mechanics Magazine, Dr. Lee de Forest, the noted radio expert, recounts from the beginning his experiments with the audion, the invention which made possible the recent achievement of sending the voice by wireless from Washington, D. C., to Honolulu. Some of his recent experiments have dealt with the production of musical tone with the aid of this little instrument, and in this field Dr. de Forest considers the possibilities unlimited. He hopes soon to complete a musical instrument sufficiently developed so that it may be turned over to musicians to work out the artistic details. In "The Key to Russia's Door" LeRoy Kenneth writes of the attempt Russia is making to keep Archangel an ice-free port by the employment of ice-crushing and ice-breaking boats.

## PROSE POEM

My Auto 'Tis of Thee, Short Cut to Pov-er-ty.

My auto 'tis of thee, short cut to poverty—of thee I chant. I blew a pile of dough, on you two years ago, and now you refuse to go, or won't, or can't. Through town of countryside, you were my joy and pride; a happy day. I loved thy gaudy hue, thy nice white tires so new, but now you're down and out for true, in every way. To thee, old rattlebox, came many bumps and knocks; for thee I grieve. Badly thy top is torn, frayed are thy seats and worn. I paid for thee a price, 'twould buy a mansion twice, now everyone is yelling "ice"—I wonder why? Thy motor has the grip, the spark plug has the pip, and woe is thine. I too, have suffered chills, ague and kindred ills, endeavoring to pay my bills since thou wert mine. Gone is my bank roll now. No more 'twould choke a cow, as once before. Yet if I had the mon, so help me John—amen, I'd buy myself a car again, and speed some more.—Brush and Pail.

## Secret Wedding Announced.

Mr. and Mrs. George Stiner, of Indianapolis, Ind., have announced their secret marriage, which occurred a year ago. Mrs. Stiner was formerly Miss Bess Ray, and for the past two seasons has been head trimmer in the miller department of the New York Store. She was here during the fall season and returned to her home in Indianapolis during the Christmas holidays.

## MR. WHITTAKER LAST NIGHT

Made Talk On Good Roads At The H. B. M. A. Rooms.

Mr. J. A. Whittaker, government engineer in charge of the road construction now going on in this county, on the Princeton road, consented to make an address at the H. B. M. A. last night and explained the plan of road-building by which the government, the state and the counties all cooperate. Mr. Whittaker is a road expert and his talk was heard with keen interest by all who were present.

## Died up a Tree.

J. G. Mooney, a well known citizen of St. Petersburg, Fla., died from heart attack in the limbs of an oak tree 40 feet from the ground, at his home. The fire department, which was called to lower the body from the tree to the ground, had a difficult task, due to the fact that the limb on which he was hanging was not strong enough to hold two persons.

## In This Paper

## Doctors Convene.

The Christian County Medical Society met Tuesday at 1:30 at the Avalon.

Dr. J. W. Crenshaw, of Cadiz, read a very fine paper on "Purity in the Life and Language of a Physician."

Dr. A. Sargent had a paper on Typhoid with interesting case reports.

The following members were appointed a committee to prepare for the State meeting here next September: Drs. B. A. Caudle, S. H. Williams, J. L. Barker and Austin Bell.

The new president, Dr. J. P. Keith, presided.

## Edison Battery Blamed.

Gas generated by the new Edison storage battery and ignited by a spark of unknown origin is held responsible for the explosion on the submarine E-2 at the New York navy yard. Because only one survivor was examined, the report was regarded by Secretary Daniels as inconclusive.
